ABOUT ME

I am a graphic designer, visual artist, and filmmaker, but I think the term that defines me most, would be "visual storyteller." Creativity, responsiveness, functionality and cohesiveness in product design are my main focus. My experience is based on marketing and advertising, with an emphasis on user interface and brand design. With over 10 years of professional experience working for a variety of marketing agencies in Europe, I aim to fulfill the needs of my clients through the best solution.
